Microsoft

Exam 70-713

Software Asset Management (SAM) – Core

Version: Demo

[Total Questions: 10]

Question No : 1

You maintain a SAM program for a customer. The customer experiences the following recent developments:

- A new SAM tool is purchased.
- The SAM program design is complete.
- The assigned SAM manager leaves the company.
- The SAM program budget is approved and allocated.

You need to maintain the SAM program.

What should you do first?

- A. Secure executive sponsorship.
- B. Secure the support of the IT department.
- C. Recommend starting a new SAM program.
- D. Generate a Microsoft Product License Advisor (MPLA) report.

Answer: C

Question No : 2

Your customer plans to improve the application recognition of a software inventory tool.

You need to measure the performance of the application recognition function.

Which metric should you use?

- A. software purchases from authorized vendors
- B. software purchases compared to software requests
- C. software requests compared to software installations
- D. unknown software executables in the environment

Answer: D

Question No : 3

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series. Information and details provided in a question apply only to that question.

You represent a SAM partner.

A client must consolidate their IT departments into a single business unit. The client was previously assessed in the Microsoft SAM Optimization Model (SOM) key competencies and assigned the maturity level of Standardized.

You need to ensure that the client progresses to the next SOM level in the Deployment Process key competency.

What should the client do?

- A. Purchase software only from approved vendors.
- B. Publish software deployment reports to stakeholders.
- C. Use information provided by a software publisher.
- D. Use software metadata generated by the client.
- E. Deploy only approved software.
- F. Formulate a retirement process.
- G. Create an inventory of deployed assets.
- H. Maintain updated records of deployed assets.

Answer: B

Question No : 4 HOTSPOT

You are a SAM partner working with a client.

You plan to complete a Microsoft SAM Optimization Model (SOM) baseline review assessment.

You need to identify the responsibilities during phase two for both organizations.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Organization	Action
Partner	Identify the process, roles, and responsibilities for the assessment. Assemble records of deployed and licensed software. Review and validate the identified priorities. Prepare customized reports based on priorities.
Client	Identify the process, roles, and responsibilities for the assessment. Assemble records of deployed and licensed software. Review and validate the identified priorities. Prepare customized reports based on priorities.

Answer:

Answer Area

Organization	Action
Partner	▼ - Identify the process, roles, and responsibilities for the assessment. - Assemble records of deployed and licensed software. - Review and validate the identified priorities. - Prepare customized reports based on priorities.
Client	▼ - Identify the process, roles, and responsibilities for the assessment. - Assemble records of deployed and licensed software. - Review and validate the identified priorities. - Prepare customized reports based on priorities.

Question No : 5

You need to monitor infrastructure and manage software deployments for an organization. You must uninstall unlicensed software from all devices.

Which tool should you use?

- A. Microsoft Intune
- B. Microsoft Assessment and Planning Toolkit (MAP)
- C. System Center Configuration Manager (ConfigMgr)
- D. Microsoft Desktop Optimization Pack (MDOP)

Answer: C

Question No : 6 DRAG DROP

An organization plans to implement a SAM program.

The program must meet the minimum requirements of the ISO 19770-1 specification and minimize administrative overhead.

You need to define the collection schedule for hardware and software inventory.

Which schedule interval should you implement for each inventory type? To answer, drag the appropriate intervals to the correct inventory types. Each interval may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Intervals

Weekly
Monthly
Twice per year
Annually
Every other year

Answer Area

Question No : 7

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series. Information and details provided in a question apply only to that question.

A client must consolidate their IT departments into a single business unit. The client was previously assessed in the Microsoft SAM Optimization Model (SOM) key competencies and assigned the maturity level of Basic.

Users install software on their own from multiple locations.

You need to help the client progress to the next maturity level.

What should you do?

- A. Purchase software only from approved vendors.
- B. Publish software deployment reports to stakeholders.
- C. Use information provided by a software publisher.
- D. Use software metadata generated by the client.
- E. Deploy only approved software.
- F. Formulate a retirement process.
- G. Create an inventory of deployed assets.
- H. Maintain updated records of deployed assets.

Answer: E

(Deployment Process).

Question No : 8

Your customer's Acquisition Process key competency has a Basic maturity level.

You need to recommend a process to improve the Acquisition Process maturity level.

Which process should you recommend?

- A. Collect entitlement records throughout the organization.
- B. Require an annual sign-off on all SAM reports.
- C. Reuse licenses as computers are retired.
- D. Require that software purchases be made from approved vendors.

Answer: D

Question No : 9

You manage the hardware and software retirement process for a customer.

The customer plans to donate several computers to a charitable organization. The computers have Windows 8 purchased as a fully-packaged product (FPP) from a local retailer. The computers also have Microsoft Office 2013 licenses that were purchased under a volume license agreement.

You have the following requirements:

- Maximize license reuse.
- Ensure that license agreements are not violated.

You need to recommend a course of action for reusing Windows and Office licensing.

Which two actions should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Donate the Office licenses with the computers.
- B. Reallocate all of the Office licenses within your organization.
- C. Donate the Windows licenses with the computers.
- D. Reallocate all of the Windows licenses within your organization.

Answer: B,C

Question No : 10 HOTSPOT

An organization deploys System Center Configuration Manager (ConfigMgr). The organization is performing an inventory of physical servers that run Linux.

Inventory reports must include details on hardware and software. The ConfigMgr instance collects software information for all servers but does not collect hardware information.

You need to ensure that ConfigMgr collects hardware information.

From the Administration tab of the ConfigMgr console, what should you configure? To answer, select the appropriate option in the answer area.
